"Shopping for clothes has always been one of my favorite activities. And since I lost a couple of inches with VelaShape, it's become even more fun. Clothes fit better, and my confidence is through the roof!"

—K.F., New York

"Even though I've always gotten plenty of exercise, I still had a real love-hate relationship with the fitting room. Now that VelaShape has helped me take an inch off my abdomen, I feel like everything I try on fits a little bit better!"

—D.R., Michigan

### Science. Results. Trust.

Syneron Candela combines the latest science with a level of expertise that ensures impressive results. Our customer understanding, superior to that of any company in our industry, has earned us the trust of physicians and patients worldwide. With breakthrough technologies currently in the pipeline, we are poised to maintain our global leadership long into the future.

SYNERON  CANDELA<sup>®</sup>

\* The VelaShape III system is FDA-cleared for temporary reduction in the appearance of cellulite and temporary reduction of thigh and abdominal circumference.

\*\* Based on results of a September 2012 study conducted by Kelton Market Research among 1,045 American women age 25 and over.

† The safety and effectiveness of the VelaShape technology has been demonstrated through multi-center clinical trials.

## Get the perfect fit.

Feel the confidence that comes from knowing you look your best with VelaShape non-invasive body contouring. VelaShape is a powerful combination of infrared light and bi-polar radio frequency that is clinically proven to reduce the appearance of cellulite and result in smoother skin.\*

Stop saying, “What if” — find a VelaShape treatment location today and start making your best fit happen!

### What causes cellulite?

There is no definite explanation for why cellulite occurs. While it may be the result of an unhealthy lifestyle, there may be other causes, including genetics or hormonal changes.

an estimated 85% TO 98% of women over the age of 16 have cellulite, regardless of their size, shape or weight.

### What sort of results can I expect?

In clinical trials, the body contouring power of VelaShape led to a reduction of one whole dress size after treatment.†

### How quickly will I notice a change after VelaShape?

You will begin to notice gradual improvement of the treated area right away as your skin's surface starts to feel smoother and firmer. Over time you will also notice a smaller circumference throughout the treated area as well as a reduction in the appearance of cellulite, and best results will be seen at about 10 weeks.

### How many treatments will I need?

You have the option to undergo one longer treatment session or three shorter sessions. Talk to your VelaShape provider about which option is best for you.

### Is VelaShape safe?

The VelaShape treatment is safe and effective for all skin types and colors. There are no reported short-term or long-term side effects.

### How does VelaShape work?

VelaShape uses a combination of technologies:

- A vacuum elevates the target tissue, bringing it closer to the energy source
- Infrared light (IR) directly heats the targeted area
- Bi-polar radio frequency (RF) energy safely guides heat evenly throughout the targeted area, so that it heats faster without damaging the skin

These energies combine to deep-heat fat cells and the surrounding tissue. The result is a smaller circumference and a reduction in the appearance of cellulite.

### Are VelaShape treatments painful?

Most patients find VelaShape comfortable and describe the treatment as feeling like a warm deep-tissue massage. The treatment parameters are easily adjusted to ensure a comfortable treatment experience. It is normal to experience a warm sensation for a few hours after your treatment. Some patients report a pinkish appearance at the treatment area that may last a few hours post treatment, and skin may appear pink for several hours.

### Are the results permanent?

Following your treatment regimen, it is recommended that you periodically receive maintenance VelaShape treatments. Like all techniques, invasive or non-invasive, results will last longer if you follow a balanced diet and exercise regimen.

### What makes the latest VelaShape treatments more effective?

Treatment sessions are now shorter, and you can see results faster than ever. Many patients now report visible results after their first visit.

## In a recent survey of American women...<sup>\*\*</sup>

- 70% worry about developing a tummy bulge
- 81% are concerned about maintaining their body shape
- 45% are afraid that cellulite will remain a concern
